LearnHub demo
Tester guide

Every screen, every button, and where it leads.

Accounts, test payments, end-to-end scenarios and how to report bugs.

Version of 08 November 2026 · Kent Business College AI team · Confidential: contains test logins

1. Read this first

LearnHub is a Udemy-style course marketplace plus a company training (compliance) workspace, built as a working sales demo. Everything is real: payments go through Stripe in test mode, videos through Bunny Stream, files through Azure, emails through Microsoft 365. Nothing is faked.

This guide walks through every screen, role by role. For each screen it says how to get there, what the screen is for, and what every button or control does and where it leads. The demo comes with realistic data (courses, learners, two companies, orders), so every screen has something to show.

Five kinds of user exist, each with their own area: the public site and learner area (everyone), the business workspace (company admins and managers), the instructor studio (approved instructors) and the admin console (platform staff). One account can have several roles; the account menu (your initials, top right) switches between the areas you have access to.

How to test

Use the right account	Sign in with the account for the role you are testing (table below). To test two roles talking to each other (for example a learner asks a question and the instructor answers), use two browsers, or a normal and a private window.
Payments are test payments	At Stripe checkout use card 4242 4242 4242 4242, any future expiry date, any 3-digit CVC and any postcode. 4000 0025 0000 3155 asks for an extra bank check (approve it). 4000 0000 0000 9995 is always declined. No real money moves.
Emails	Sign-up confirmation, invitations, receipts and notifications are real emails. Use an email address you can open. If an email does not arrive within a few minutes, report it.
Waiting	Some numbers update in the background (badges, compliance status, emails). If something looks out of date, wait 30 seconds and refresh before reporting it.
Things that cannot be undone	Refunds, payouts marked as paid, deleting (anonymising) an account, revoking a certificate and maintenance mode affect real demo data. Use the accounts you create yourself for these tests, not the seeded ones, and switch maintenance mode off again straight after testing it.
Phone and dark mode	Every screen should work on a phone (no sideways scrolling) and in dark mode (account menu > theme). Please test both.

Test accounts

Role	Email	Notes
Platform staff (admin console)	`admin@learnhub.example.com`	Everything in /console, plus the learner area
Instructor (studio)	`daniel.reeve@learnhub.example.com`	Daniel Reeve: has the most courses, sales and payouts
Instructor (studio)	`amira.haddad@learnhub.example.com`	Amira Haddad

Role	Email	Notes
Instructor (studio)	`leo.martins@learnhub.example.com`	Leo Martins
Instructor (studio)	`priya.nair@learnhub.example.com`	Priya Nair
Company admin / HR	`hana.cole@brightwater.example.com`	Brightwater Care Group (42 people)
Company admin / HR	`omar.price@northwind.example.com`	Northwind Logistics (26 people)

Password for every account above: `zyad1234`

Managers, company learners and marketplace learners were created with generated names and also use this password. To find one: sign in as a company admin, open **People** and filter by role "Manager" or "Learner"; or sign in as staff and open **Students** (filter by enrolments to find a learner with purchases). For sign-up, refunds, deleting accounts and other one-way tests, create your own accounts with an email you can open.

Sign in at `/login`. Please don't change these passwords or delete these accounts.

Not part of this test

- Sign in with Google or Microsoft (set up later; the buttons do not show yet).
- Real money: Stripe is in test mode, instructor payouts are recorded but no bank transfer is made.
- Protected video (DRM) is offered as a paid add-on; the protection itself is a Bunny enterprise feature not switched on in the demo.
- The language setting only changes the page language tag; the site is English only.
- Discounts on subscriptions are applied by Stripe; their per-person limit is not counted by LearnHub.

How to report a bug

Where	The page address (copy it from the address bar) and the account you used.
Steps	Numbered steps from the start, e.g. 1. Sign in as learner 2. Open My learning 3. Click Continue.
Expected	What you thought would happen.
Actual	What happened instead. Copy any message word for word.
Evidence	A screenshot or short screen recording. For errors, press F12 > Console and screenshot any red lines.
Device	Browser and device (e.g. Chrome on Windows, Safari on iPhone), light or dark mode.

2. Contents

3. Public site (visitors)

- Home page
- Course page
- Verify a certificate
- Create an account
- Course catalogue
- Plans
- Log in
- Page not found

4. Learner area

- My learning
- Certificates
- Required training
- Wishlist
- Purchase history
- Help & support
- Course player
- Achievements
- Notifications
- Cart and checkout
- Settings (account)
- Teach on LearnHub

5. Business workspace (company admin and manager)

- Compliance overview
- Requirements
- People
- Locations & teams
- Course library
- Billing
- Training matrix
- Reports
- Person
- Invitations
- Assign training
- Company settings

6. Instructor studio

- Studio dashboard
- Course builder: Details
- Course builder: Pricing
- Course builder: Certificate
- Students
- Q&A and reviews
- Payouts
- My courses
- Course builder: Curriculum
- Course builder: Coupons
- Course builder: Publish
- Assignments (marking)
- Sales & earnings

7. Admin console (platform staff)

- Admin dashboard
- Instructor management
- Sales & orders
- Pricing
- Commissions
- Reports and analytics
- Reviews & moderation
- Certificate management
- Platform settings

- Audit log

8. End-to-end scenarios

9. Who gets which notification

3. Public site (visitors)

> What anyone sees before signing in. Sign out, or use a private window, to test these.

3.1 Home page

Address: `/`

The shop window. Shows what LearnHub is, popular and new courses, categories and the subscription plans.

Control	What it does / where it leads
Search box ("What do you want to learn?")	Type and press Enter: opens the catalogue filtered by your words.
Browse by category tiles	Open the catalogue filtered to that category.
Course cards (Most popular, New and noteworthy)	Open that course's page.
View all	Opens the full catalogue (/courses).
Personal Plan / Team Plan panels	Open the Plans page with that plan explained.
Create an account	Opens sign-up (/signup).
Log in (header)	Opens the sign-in page (/login).
Cart icon (header)	Opens your cart; asks you to sign in first if you are a visitor.
Footer links	Help, privacy and teaching pages (see Known limits if a link is not ready).
Theme toggle	Switches light / dark mode for this browser.

3.2 Course catalogue

Address: `/courses`

Every published course, with filters. On a phone the filters open in a drawer.

Control	What it does / where it leads
Filters: Category, Level, Price, Rating	Narrow the list at once; the address changes so the filtered view can be shared or bookmarked.
Filter chips above the list	Show active filters; the x on a chip removes it.
Sort by	Most popular, highest rated, newest, price.
Layout (grid / list)	Switch between cards and a compact list.
Scrolling to the bottom	Loads more courses automatically.
A course card	Opens the course page.

Control	What it does / where it leads
"No courses match"	Shown when the filters exclude everything; clear a filter to see courses again.

3.3 Course page

Address: `/courses/<course>`

Everything about one course before buying: description, curriculum, instructor, reviews and price.

Control	What it does / where it leads
Add to cart	Adds the course; a message confirms it and "View cart" appears.
Buy now / Enrol now	Buy now goes straight to Stripe checkout for this one course. Enrol now (free courses) enrols you and opens the player.
Start learning / Continue learning	Shown once you own the course: opens the player.
Included in your Personal Plan	For subscribers: start the course without paying.
Preview this course	Plays the course's promo video.
Wishlist (heart)	Saves the course to your wishlist (sign-in needed).
Preview lectures (free preview)	Play the lectures the instructor marked as free preview.
Course content	Expand modules to see every lecture and its length.
Learner feedback	Average rating, rating breakdown and written reviews.
Instructor name	Shows the instructor's profile and other courses.
Breadcrumb	Back to the catalogue / category.

3.4 Plans

Address: `/plans`

The Personal Plan (one person, every included course, monthly with a free trial) and the Team Plan (company seats).

Control	What it does / where it leads
Start free trial (Personal Plan)	Stripe checkout for the subscription; after payment the included courses unlock.
More seats / Fewer seats (Team Plan)	Change the number of seats; the price updates. Minimum seats apply.
Company name (Team Plan)	Names the company workspace that is created after payment.
Buy Team Plan	Stripe checkout; afterwards you become the admin of a new company workspace.
Questions	Answers to common questions (expand each).

3.5 Verify a certificate

Address: `/verify and /verify/<code>`

Anyone (for example an employer) can check that a certificate is genuine.

Control	What it does / where it leads
Verification code + Check	Shows the learner's name, course, date and CPD hours if the code exists.
Revoked / expired result	Shows clearly if staff revoked the certificate or it has expired.
"No certificate with this code"	The code is wrong or does not exist.

3.6 Log in

Address: `/login`

Sign in with email and password.

Control	What it does / where it leads
Email + Password + Log in	Signs you in and takes you to your area (My learning, business, studio or console).
Code (Verify and log in)	Only if the account has 2-step sign-in: enter the 6-digit code from the authenticator app.
Forgot password?	Sends a reset link by email.
Create an account	Opens sign-up.

3.7 Create an account

Address: `/signup`

New learner accounts. Sign-up can be switched off by staff (Settings), then it says "Sign-ups are closed".

Control	What it does / where it leads
Email + Password + Create account	Creates the account and sends a confirmation email ("Check your inbox").
Link in the email	Opens /account/verify-email/..., confirms the address and signs you in.
Log in	Back to the sign-in page.

3.8 Page not found

Address: `any wrong address`

Shown for an address that does not exist.

Control	What it does / where it leads
Go home	Back to the home page.

4. Learner area

> Sign in as the marketplace learner. Everything here is also available to every other account.

4.1 My learning

Address: `/learn`

The learner's home: the course to continue and every course they own.

Control	What it does / where it leads
Continue your learning	Opens the player at the lecture where you stopped.
Course tiles (My courses)	Open that course in the player; the bar shows progress.
Browse courses	Shown when you have no courses: opens the catalogue.
Left menu	Certificates, Achievements, Required training, Wishlist, Purchase history, Notifications, Help & support, Settings.

4.2 Course player

Address: `/learn/<course>/lecture/<lecture>`

Full-screen place to learn. Works on a phone (the course outline becomes a drawer).

Control	What it does / where it leads
Course content (sidebar)	Every module and lecture with a tick when done; click to jump. A lock means "finish the earlier lesson first".
Progress ring	Percentage of the course completed.
Previous / Next lecture	Move through the course in order.
Complete	Marks a reading, link or download lecture as done. Videos complete themselves once watched.
Video	Plays from where you left off; watch time is saved every 30 seconds and when you leave.
Parts of this video / Key moments	Jump to that point in the video.
Lecture files	Download the files the instructor attached.
Live session	Shows a countdown; the join link appears 15 minutes before it starts.
Quiz	One question at a time, timer if set, Submit (asks to confirm if questions are unanswered), then results and Review your answers. Attempts are limited if the instructor set a limit.

Control	What it does / where it leads
Assignment	Write an answer, add a link and/or up to 5 files, then Hand in your work. Status: Waiting for marking > Marked (score and feedback) or Returned to you.
Overview tab	Course description and the lecture's files.
Notes tab	New note pinned to the current video time; click a note's time to jump there; Edit / Delete note.
Q&A tab	Search questions, Ask a question, answer others, vote, mark yours as resolved, Report anything inappropriate.
Announcements tab	Messages the instructor sent to everyone on the course.
Review tab	Give stars and a written review; you can change it later.
Finishing the course	A celebration appears with the certificate (download PDF / copy verify link).
Back to my learning	Leaves the player.

4.3 Certificates

Address: `/learn/certificates`

Every certificate earned.

Control	What it does / where it leads
Download (PDF)	Downloads the certificate in the design chosen for the course.
Verify	Opens the public verification page for that certificate.
Copy link	Copies the verification link to share ("Verification link copied").
Continue learning	Shown when there are no certificates yet.

4.4 Achievements

Address: `/learn/achievements`

Badges earned (first course, keen learner, first review, helper...).

Control	What it does / where it leads
Badge tiles	Earned badges in colour, others greyed out with how to get them.

4.5 Required training

Address: `/learn/required`

Courses a company requires from this person, with due dates. Only for people who belong to a company.

Control	What it does / where it leads
A required course	Opens it in the player.
Status (Due, Overdue, Expiring, Complete)	Comes from the company's requirements and the renewal period.
"No company training"	Shown for people with no company.

4.6 Notifications

Address: `/notifications`

Everything the platform told you. The bell in the header shows the unread count.

Control	What it does / where it leads
A notification	Opens the related page (the answer, the marked work, the receipt...) and marks it read.
All / Unread	Show every notification or only unread ones.
Mark all read	Clears the unread count.
Show older	Loads earlier notifications.

4.7 Wishlist

Address: `/wishlist`

Courses saved for later.

Control	What it does / where it leads
Add to cart	Moves the course into the cart ("Moved to your cart").
Remove	Removes it ("Removed from your wishlist").
Browse courses	Shown when empty.

4.8 Cart and checkout

Address: `/cart`

Courses about to be bought.

Control	What it does / where it leads
Coupon code + Apply	Applies an instructor coupon or a platform promotion; the discount shows per course.
Remove coupon	Takes the discount off.

Control	What it does / where it leads
Pay in (currency)	Choose the currency; prices are converted using the platform's exchange rates.
Wishlist icon on a course	Moves the course to your wishlist ("Moved to your wishlist").
Remove	Removes a course from the cart.
Checkout	Opens Stripe's payment page (use the test card).
After paying	The thank-you page waits for the payment to be confirmed, then shows My purchases / View receipt and the course is in My learning.

4.9 Purchase history

Address: `/account/orders`

Every order, receipt and refund.

Control	What it does / where it leads
View receipt / invoice	Opens Stripe's receipt.
Refund	Within the refund window (30 days by default): enter a reason (optional) and confirm. The course is removed and the order shows Refunded or Partly refunded.
Keep the course	Closes the refund box without refunding.

4.10 Settings (account)

Address: `/account`

Profile and preferences.

Control	What it does / where it leads
Full name, Time zone, Currency + Save changes	Updates your profile ("Profile saved").
Current password + New password	Changes the password ("Password changed").
Notifications	Choose which notifications you get in the app and by email.
2-step sign-in: Turn on	Shows a QR code and key: scan it with an authenticator app, type the code, Confirm it. From then on sign-in asks for a code. Turn off asks for your password.
Companies	The companies you belong to; switch into a company's workspace.

4.11 Help & support

Address: `/support and /support/<request>`

Contact the platform team and follow the conversation.

Control	What it does / where it leads
New request	Topic, subject and message, then Send: creates a request with a reference number ("Request … sent").
A request in the list	Opens the conversation.
Write a reply + Send reply	Adds a message; staff are notified.
Close request	Marks it closed ("Request closed").
Statuses	Open, Waiting for you, Resolved, Closed.

4.12 Teach on LearnHub

Address: `/teach`

Apply to become an instructor.

Control	What it does / where it leads
Headline, About you, Website (optional) + submit	Sends the application to staff ("We review it"). Staff are notified.
After approval	"Open the studio" appears and the studio is in the account menu.
Invitation link (/teach/invite/…)	If staff invited you: accept to become an instructor straight away.

5. Business workspace (company admin and manager)

> The business workspace is where a company runs its staff training. Company admins (HR) see everything; managers see only the locations and teams they manage and cannot change company settings. Open it from the account menu ("<Company> dashboard"). The sidebar and header take the company's own colours (Settings > Branding).

5.1 Compliance overview

Address: `/business`

How up to date the company's training is: overall compliance ring, overdue and due-soon counts, by requirement and by location.

Control	What it does / where it leads
Figures (Overdue, Due in 30 days, Expired)	Count up when the page opens; click one to open the matrix filtered to it.
Compliance by requirement	One bar per requirement; click to open the matrix for it.
By location	Compliance per site/team.
Needs attention list + Send reminder	Emails that person a reminder ("Reminder sent to ...").
Open matrix	Opens the training matrix.
Header search	Search people by name or email (opens People).

5.2 Training matrix

Address: `/business/matrix`

People down the side, requirements across the top, a coloured status in every cell.

Control	What it does / where it leads
Search people, Location or team, Job role, Status, Requirement filters	Narrow the grid; the address keeps the filters.
Status colours legend	Explains complete, due soon, overdue, expired, exempt, not required.
A cell	Opens a side panel for that person and requirement, with its history.
Side panel: Extend	Gives more time (new due date).
Side panel: Exempt / Revoke exemption	Excuse the person from this requirement, with a reason; revoking keeps the history.
Side panel: Record completion	Records training done outside LearnHub (date, evidence).
Side panel: Void	Cancels a recorded completion, with a reason.
Side panel: Send reminder	Emails the person.

Control	What it does / where it leads
Open profile	Opens the person's page.
Load more	Loads the next people.
On a phone	Shows a list of people sorted by their worst status instead of the grid.

5.3 Requirements

Address: `/business/requirements`

The training rules: which course, for whom, how often it must be renewed. Managers can only look.

Control	What it does / where it leads
New requirement	Opens a form: Course, Schedule (renewal every N months), Reminders, Who it applies to (everyone, job roles, locations/teams).
A requirement	Edit it the same way; the compliance ring shows how many people meet it.
Archive	Asks to confirm, then stops tracking it (history kept).
Matrix	Opens the matrix for that requirement.

5.4 Reports

Address: `/business/reports`

Compliance by requirement, by location, and the audit trail (admins only).

Control	What it does / where it leads
Tabs: by requirement / by location / audit trail	Switch report.
Show for location or team	Limit the report to one part of the company.
Export / Download CSV	Downloads the report as a spreadsheet ("Your CSV is downloading").
Audit trail: Show actions	Who did what and when (exemptions, completions, invites...).

5.5 People

Address: `/business/people`

Everyone in the company, with their compliance.

Control	What it does / where it leads
Search, Filter by role / unit / job role	Narrow the list.
Figures (People overdue, Pending invites, Unit managers)	Quick counts.

Control	What it does / where it leads
A person	Opens their page.
Invite people	Opens Invitations.

5.6 Person

Address: `/business/people/<person>`

One employee: profile and training.

Control	What it does / where it leads
Profile tab: Role, Units, Job roles, Job title, Employee reference + Save changes	Updates them ("Profile saved"). Changing units or job roles changes which requirements apply.
Training tab	Each requirement and course with status, and Certificates.
Remove from company	Asks to confirm; the person loses access to company training (history kept). You cannot remove yourself.

5.7 Locations & teams

Address: `/business/units`

The company's structure (sites and teams) and job roles.

Control	What it does / where it leads
Add a location or team	Name, type and code; can sit under another unit.
A unit's actions	Rename, add a team below, choose managers (search people, Save), archive.
Job roles: New job role	Adds a role used by requirements; rename or archive it.

5.8 Invitations

Address: `/business/invites`

Invite staff by email (one or many). Admins only.

Control	What it does / where it leads
Email addresses + Role + Unit (optional) + Job role (optional) + Invite	Sends invitation emails. If seats run out it says so and offers Add seats.
Waiting to join list	Invitations not yet accepted.
Revoke	Asks to confirm; the link stops working ("Invitation revoked").
Invitation email > /invite/<link>	The person signs up or logs in, confirms their email, then Accept and join puts them in the company workspace.

5.9 Course library

Address: `/business/library`

Courses available to the company (LearnHub's business library plus the company's own).

Control	What it does / where it leads
All / Company / LearnHub	Filter by where courses come from.
Search courses	Find a course.
A course	Opens a panel with who has it: In progress, Completed, Expired.

5.10 Assign training

Address: `/business/assign`

Give a course to people in 3 steps.

Control	What it does / where it leads
1. Choose a course	Search and pick one.
2. People / Units	Pick people, or whole locations/teams.
3. Check and assign	Shows the exact number of people who will get it, then Assign course. The people are notified.
Assign another course	Starts again.

5.11 Billing

Address: `/business/billing`

The company's Team Plan, seats and invoices. Managers see "Billing is managed by admins".

Control	What it does / where it leads
More seats / Fewer seats	Changes the seat count through Stripe.
Manage billing	Opens Stripe's billing portal (card, invoices, cancel).
Compare plans	Opens the Plans page.
Invoices	Download each invoice.

5.12 Company settings

Address: `/business/settings`

Company name and branding.

Control	What it does / where it leads
Company name	Renames the workspace.

Control	What it does / where it leads
Main colour, Accent colour, Logo link + Save branding	The live preview shows the result; after saving, the sidebar and header use these colours ("Branding saved").
Records and data	What the company's records keep.

6. Instructor studio

> The studio is the instructor's workspace: build courses, run them, mark work, answer learners and follow earnings. It appears in the account menu once staff approve the instructor.

6.1 Studio dashboard

Address: `/studio`

The instructor's day at a glance.

Control	What it does / where it leads
Figures (Students, Average rating, Earned this month)	Count up on load.
Needs attention: To mark, Unanswered questions	Open the marking queue or the Q&A inbox.
Earnings chart + See sales	Opens Sales & earnings.
Your courses + View all	Open a course in the builder / the course list.
Quick actions / Create your first course	Opens the Create a course box.

6.2 My courses

Address: `/studio/courses`

Every course the instructor owns.

Control	What it does / where it leads
Search your courses, Filter by status	All, Drafts, In review, Changes requested, Published.
Create a course	Course title and Category (optional), then it opens the builder ("Course created").
A course	Opens the course builder.

6.3 Course builder: Details

Address: `/studio/courses/<course>`

Title, subtitle, description and settings.

Control	What it does / where it leads
Title, Subtitle, Description, What you'll learn, Requirements	The course page text.

Control	What it does / where it leads
Category, Level, Language, CPD hours	Used by the catalogue filters and certificates.
Course image (image link)	The card and course page picture.
Include in personal plans / Include in business plans	Lets subscribers or companies take the course.
Save details	Saves the draft ("Details saved"). Nothing changes for learners until the version is approved.

6.4 Course builder: Curriculum

Address: `/studio/courses/<course>/curriculum`

Modules and lessons of every kind.

Control	What it does / where it leads
Add module / module title	Creates a module; rename it in place; More actions (...) on a module or lesson for rename, free preview, remove.
Add lesson (title + type)	Types: Video, Reading, Link, Live session, Download, Quiz, Assignment.
Drag handle	Reorders lessons and modules; the order is saved.
Lesson editor: Video	Upload video / Choose a video file, or Link to the video file; Bulk upload videos into a module; Processing shows until Bunny is ready; Thumbnail (frames from the video or an image link); Parts of this video and Key moments; Subtitles (language + file); Remove the video.
Lesson editor: Reading	Rich text with Bold, Italic, Heading, lists and links.
Lesson editor: Live session	Starts, Length (minutes), Join link (Teams / Zoom).
Lesson editor: Quiz	Quiz settings (Pass mark, Time limit, Attempts allowed, Shuffle questions/options, Show correct answers) and questions: Multiple choice, Multiple response, True or false, Short answer, Fill in the blanks, Matching, Essay, each with Marks and an Explanation.
Lesson editor: Assignment	Instructions, Maximum score, Pass mark, rubric, Due (days after enrolling), Accept late work, Resubmissions allowed, and what learners hand in (Written answer, Link, File upload).
Lecture files	Attach downloadable files (uploaded straight to Azure); rename or remove them.
Free preview / Required / Prerequisite lesson	Free preview plays on the course page for everyone; Required counts toward completion; Prerequisite locks the lesson until an earlier one is done.
Go to Publish	Opens the Publish tab.

6.5 Course builder: Pricing

Address: `/studio/courses/<course>/pricing`

The course price (a price tier; staff set the exact amount in each currency).

Control	What it does / where it leads
Course price + Save price	Sets the price tier or Free ("Price saved").

6.6 Course builder: Coupons

Address: `/studio/courses/<course>/coupons`

The instructor's own discount codes (sales through them earn the instructor a higher share). Only if staff allow coupons.

Control	What it does / where it leads
New coupon: Code, Discount (%), Maximum uses, Lasts (days) + Create coupon	Creates it ("Coupon … created").
Status: Active, Scheduled, Used up, Expired, Off	Shown per coupon with uses so far.
Turn off	Asks to confirm, then the code stops working.

6.7 Course builder: Certificate

Address: `/studio/courses/<course>/certificate`

Which certificate design learners get.

Control	What it does / where it leads
Certificate template	The platform default, an approved platform template, or one of your approved designs.
Design your own (Style, colours, Heading, wording lines, Signed by, Their title, Show the QR code)	Live preview while editing.
Save certificate / Send for approval	Your own designs go to staff: Waiting for approval > Approved or Not approved (with the reason). Editing an approved design sends it back for approval.

6.8 Course builder: Publish

Address: `/studio/courses/<course>/publish`

The checklist and submitting for review.

Control	What it does / where it leads
Checklist	Lists anything missing (details, at least one lesson, price, broken prerequisite...) with Go to details / curriculum / pricing.
What changed (optional), This is a major change, Learners must redo the course	Notes for the reviewer; a major change goes in the staff "Course changes (major)" queue.
Submit for review	Status becomes Waiting for review; staff are notified. Staff approve (course goes live, instructor notified), request changes (notes shown here) or reject.
Version history	Every version with its status.
Editing a live course	Starts the next draft version while the live one stays on sale ("Draft version N created"). Learners see changes only after staff approve it.

6.9 Students

Address: `/studio/students`

Everyone on the instructor's courses.

Control	What it does / where it leads
Search, Course, Filter by status, Sort	Narrow and sort the list.
Columns: Progress, Last active, Completed	How each learner is doing.

6.10 Assignments (marking)

Address: `/studio/grading`

Work waiting to be marked: assignments and essay / short-answer quiz questions.

Control	What it does / where it leads
Work to mark list	Pick a submission; Previous / Next move through the queue.
Their answer	Text, link and files the learner handed in.
Mark and feedback: Points (per rubric line), Feedback + Save mark	Saves the mark and says if it is a pass; the learner is notified and sees the score and feedback in the player. Essay quiz answers use Save points ("Answer marked").
Resubmissions	If the assignment allows them, the learner can hand in again after marking.

6.11 Q&A and reviews

Address: `/studio/questions`

One inbox for learners' questions, reviews and the instructor's announcements.

Control	What it does / where it leads
Questions tab: All / Unanswered, pick a question, Your answer + Post	Answer shows with an Instructor badge; the learner is notified.
Reviews tab: All / No reply yet, Your reply + Post reply	Public reply under the review; the reviewer is notified.
Announcements tab: New announcement (Course, Title, Message, Preview)	Sends to every learner on the course (in-app and email).

6.12 Sales & earnings

Address: `/studio/revenue`

What the instructor earned and from where.

Control	What it does / where it leads
Figures: Earned all time, Available, Pending, Paid out	Pending money is still in the hold period (refund window).
Your rates	"You keep X% of each marketplace sale" plus coupon and subscription rates (set by staff).
Earnings by course; Marketplace sales / Your coupon sales / Personal-plan share	Breakdown.
See payouts	Opens Payouts.

6.13 Payouts

Address: `/studio/payouts`

Getting paid.

Control	What it does / where it leads
Add payout method	Stripe Connect (account ID), PayPal, Wise or Bank transfer (only the last digits are stored; staff verify it before paying).
Default payout method	Which method requests use.
Request a payout: Amount + Note for our team	Only the available balance (past the hold and above the minimum). Staff are notified; status Awaiting approval > Approved, being sent > Paid (or Rejected / Failed with a reason).
Payout schedule	The day of the month, minimum and hold set by staff.
Payout history	Every payout and its status.

7. Admin console (platform staff)

> The admin console is for the platform team (staff accounts only). Anyone else who opens /console is refused. The sidebar groups: Dashboard, Courses, Instructors, Students, Money (Sales & orders, Subscriptions, Pricing, Promotions, Commissions, Payouts), Reports, Quality (Approvals with a live count, Reviews, Communications, Certificates), Companies, Platform (Settings, Audit log). The search box in the header finds users, instructors, courses, orders, tickets and certificates (type 2+ letters, use the arrow keys and Enter). Every change made here is written to the Audit log, and money or destructive actions always ask for confirmation, usually with a reason.

7.1 Admin dashboard

Address: `/console`

The platform at a glance.

Control	What it does / where it leads
Date range (7 / 30 / 90 days, custom)	Changes every figure and chart; each figure shows the change vs the previous period.
Platform overview: Students, Instructors, Courses, Enrolments	Totals for the period.
Sales overview + chart	Total revenue, courses sold, subscriptions, revenue per day.
Pending approvals (New courses, Course changes (major), Certificate templates) + View all	Open the approval queue on that tab.
Payout requests + View all	Count and total waiting; opens Payouts.
Needs attention	Reported content, disputed payouts, failed payments, stuck background jobs; each line links to where to fix it.
Recent activity	Latest events (course submitted, approved, new instructor, payout request, order) with links.
System health	Database, cache, queue, storage, video (Bunny), email and payments (Stripe): Working / slow / Down. A red tile also alerts all staff once an hour.

7.2 Course management

Address: `/console/courses`

Every course on the platform.

Control	What it does / where it leads
Tabs: All / Company / Instructor / Categories / Archived	Switch list; figures show totals, published, pending, drafts, archived.
Search, Status, Category filters	Narrow the list.

Control	What it does / where it leads
Tick boxes + Bulk actions	Publish, Unpublish (reason), Archive, Duplicate, Change category, Delete. Delete hides the course (nothing is erased) and asks to confirm.
A course row	Opens the details panel: Overview, Content, Pricing & access (price, subscription inclusion, access duration in days, language, status, certificate template), Performance (enrolments, completion, rating, revenue, refunds), Versions.
Unpublish (reason) / Relist	Takes a course off sale (existing learners keep it; instructor notified) or puts it back.
Create company course	A course owned by the platform; Create and open builder opens the studio builder for staff.
Categories tab: New category, rename, reorder, hide	Changes the catalogue's categories.

7.3 Instructor management

Address: `/console/instructors`

Instructors, applications and invitations.

Control	What it does / where it leads
Applications tab: Approve / Reject application (reason)	Approved people can teach at once ("... can now teach"); both outcomes notify them.
Add instructor (Full name, Email)	Emails an invitation link valid for 7 days ("Invitation sent to ...").
Invitations tab: Resend / Cancel invitation	Resend gives a fresh 7 days; Cancel stops every link sent for it.
Search, Filter by status / permission, Export	Narrow or download the list.
An instructor: Overview, Courses, Permissions, Earnings, Payouts	Their details panel.
Permissions: Publish without review, Create coupons, Use protected video (DRM), Issue certificates, Course limit + Save changes	Enforced in their studio at once; the instructor is notified.
Commission rate: Instructor keeps (%) + Save rate / back to default	Applies to sales from now on; past earnings never change.
Edit instructor	Headline, bio, website.
Suspend instructor / Reactivate	Suspended instructors lose studio access; their courses stay on sale.

7.4 Student management

Address: `/console/students`

Every learner account.

Control	What it does / where it leads
Figures: Total, Active, Suspended, New (last 30 days)	Counts.
Search, Filter by status / enrolments, Export	Narrow or download.
A student: Overview, Enrolments, Progress, Activity	Their details: joined, last signed in, orders, companies, certificates.
Edit account	Full name and email.
Suspend account / Reactivate	A suspended person cannot sign in; they are emailed.
Delete account	Anonymises the person for GDPR: type the confirmation phrase; cannot be undone. Blocked for yourself and the seeded demo accounts.
Open instructor profile	If they also teach.

7.5 Sales & orders

Address: `/console/sales`

Money in.

Control	What it does / where it leads
Tabs: Overview, All orders, Refunds, Invoices	Switch view.
Figures: Total sales, Total revenue, Course sales, Subscriptions, Refunds, Average order value + Sales trend, Sales by product type	For the date range.
Search and filters: status, product, payment method, currency	Narrow the orders.
An order	Items, discount, VAT, total, payment method (card brand and last 4), Stripe reference.
Refund this course (reason)	Refunds through Stripe; the learner loses access and is told ("Refunded. The customer has been told.").
Invoice	Opens Stripe's invoice; "Stripe hasn't sent an invoice" for orders without one.
Export	Downloads the orders as CSV.

7.6 Subscriptions

Address: `/console/subscriptions`

Plans and subscribers.

Control	What it does / where it leads
Tabs: Overview, Plans, Subscribers, Payments, Plan changes, Revenue	Switch view.
Create plan (name, audience, billing cycle, free trial days, minimum seats, renewal type, price)	Creates the plan with a Stripe test price.
A plan: Overview, Included courses, Pricing, Settings	Choose which courses the plan includes (empty = every course marked for subscriptions); set a price per currency (creates a Stripe price).
Duplicate / Deactivate / back on sale	A copy starts switched off; deactivating stops new sign-ups.
Subscribers: Cancel subscription	Ends it at the end of the period; the subscriber is told.
Plan changes	Upgrades, downgrades, seat changes, renewals, cancellations and failed payments from Stripe.

7.7 Pricing

Address: `/console/pricing`

Course prices, currencies and exchange rates.

Control	What it does / where it leads
Course prices	Every course with its pound price and each active currency; Change price / Edit prices; export.
Price tiers	The standard price points; set a tier's amount per currency.
Currencies and exchange rates	Switch a currency on/off, enter a rate manually or Refresh rates (unlocked prices recalculate).
Regional prices: Add regional price (Country code, Course, Currency, Price)	Buyers from that country see that price; Switch off to stop it.
Bulk price update	Pick courses, set a new tier or percentage.
Price rules: Add price rule (Which courses, Percentage, Round to the) + Apply rule	Shows the affected courses first and asks to confirm ("New prices are live").
Pricing settings	Currency shown by default and other options.

7.8 Promotions

Address: `/console/promotions`

Platform-wide discounts.

Control	What it does / where it leads
Tabs: All promotions, Campaigns, Discount rules, First purchase offers, Subscription discounts, Eligibility and limits, Settings	Switch view.
Create promotion: Name, Code, Type, Discount (%), What it applies to, Who can use it, Starts / Ends, Total uses, Uses per person, Minimum order	Saves it; status Draft, Scheduled, Active or Ended.
A promotion: Overview, Conditions, Usage, Activity	Uses, discount given, revenue generated.
Duplicate / Deactivate	A copy is saved as a draft; deactivating stops the code at once.
How discounts combine (Settings)	Whether a promotion can stack with an instructor coupon.
At checkout	The code works only for the courses, people and dates it targets.

7.9 Commissions

Address: `/console/commissions`

How sales are shared between the platform and instructors.

Control	What it does / where it leads
Commission settings: Default commission (instructor keeps %), Subscription revenue pool, Sales through the instructor's coupon, Discount impact + Save changes	Applies to sales from now on.
Instructor commissions: Save rate per instructor	The instructor is told.
Commission rules: Add rule (Applies to course / instructor / category / price band, rate, priority, Starts / Ends)	Rule priority: course > instructor > category > price band > default.
Which rate applies? (Course to check)	Shows the rate a sale of that course would use now.

7.10 Payouts

Address: `/console/payouts`

Paying instructors.

Control	What it does / where it leads
Tabs: Overview, Requests, Balances, Payouts, Payout methods, Settings	Switch view.
A request: Approve / Reject (reason) / Mark paid (reference) / Mark disputed / Mark failed (reason)	Each asks to confirm and notifies the instructor.
Run payouts	Creates the monthly payouts for everyone above the minimum (asks to confirm).
Payout methods: Verify details / Mark verified	Checks an instructor's details before paying ("Verified. The instructor was told.").
Payout settings: Instructors can request payouts, Day of the month, Minimum payout (£), Hold after a sale (days)	The hold can't be shorter than the refund window.

7.11 Reports and analytics

Address: `/console/reports`

Read-only reports.

Control	What it does / where it leads
Tabs: Overview, Sales reports, Student reports, Course reports, Subscription reports	Switch report.
Date range, Course category, Instructor	Filter every chart and table.
Charts: revenue trend, enrolments by type, sales by product type, revenue by currency, top courses, recent sales	Figures compare with the previous period.
Export (CSV)	Downloads the report.

7.12 Approvals

Address: `/console/approvals`

Course reviews and certificate templates waiting for a decision.

Control	What it does / where it leads
Queue tabs: All, New courses, Course changes (major), Certificate templates + Search	Pick an item.
Review: Course preview, Content & checklist, Instructor details, Approval history	Everything needed to decide; lectures can be previewed.
Approve	The version goes live on the marketplace; the instructor is notified.
Request changes (notes required)	Back to the instructor with the notes.
Reject course (reason)	Closed; the instructor is told why.
Certificate template: Approve / Reject template	The instructor can use it, or sees the reason.

7.13 Reviews & moderation

Address: `/console/reviews`

Reviews, questions and answers, and what learners reported.

Control	What it does / where it leads
Reported by learners: Hide content / Keep it (dismiss)	Hiding removes it from the site and tells the author and the reporter.
Reviews, Questions & answers lists: Hide / Show (reason)	Filter by rating and visibility; search text, author or course.
Figures: Open reports, Low ratings (30 days), hidden items	Counts.

7.14 Communications & support

Address: `/console/communications`

Support tickets, notifications, broadcasts and wording.

Control	What it does / where it leads
Support tickets: figures (Open, In progress, Resolved this month, Avg. first response)	Counts.
A ticket: Conversation, Reply or Internal note, Attach a file, Status, Priority, assign	Replies notify the learner; internal notes are only visible to staff.

Control	What it does / where it leads
Create ticket	Open a ticket for a user.
Notifications: Sent notifications log + filters	What the platform sent and whether it was emailed and read.
Broadcast: Who receives it, Title, Message, Link, Send in the app / Send by email, Show as a site banner (from / until)	Shows the recipient count and asks to confirm; End banner removes a banner early.
Notification templates: edit Title and Message, Placeholders you can use, Preview, Active / email	Saving refuses a missing or misspelt placeholder; Back to the default wording restores the original.

7.15 Certificate management

Address: `/console/certificates`

Certificate designs and every issued certificate.

Control	What it does / where it leads
Templates: create, Edit template, Duplicate template, set default, Archive	Style, colours, wording, signatory and signature image (PNG/JPEG up to 1 MB), QR code; live preview.
Pending approvals + Review now	Instructor designs waiting (also in Approvals).
Issued certificates: search, filter, export	By certificate ID, learner, course or email.
Verify	Checks a code.
Revoke certificate (reason)	The learner is told; /verify shows it as revoked.
Set expiry date	/verify shows it as expired after that date; the learner is reminded 30 days before.
Download certificate (PDF)	The PDF in its design.

7.16 Companies

Address: `/console/companies`

Every company workspace.

Control	What it does / where it leads
Create company (Company name, Web address name, Owner email, Seat limit, Billing currency)	Creates the workspace; the owner is welcomed.
Search, Filter by status	Active, On trial, Suspended.

Control	What it does / where it leads
A company: Details, Admins, Subscriptions, Add-ons and access	Edit name, seats and status; Add / Remove admin.
Add-ons: Switch on / Switch off (e.g. protected video), For (days) or Always	Company admins are notified.

7.17 Platform settings

Address: `/console/settings`

Six tabs, saved together; a preview shows the platform identity.

Control	What it does / where it leads
General: Platform name, tagline, logo and favicon upload, default language, default currency, time zone, date format	Used across the site, emails and PDFs.
Switches: Registration enabled, Instructor applications, Guest browsing, Maintenance mode	Enforced at once; staff always get through. Maintenance asks to confirm (Save and close the site) and shows a maintenance page to everyone else.
Payment, Learning, Notification, Instructor tabs	Refund window, review rules, certificate defaults, digests, instructor options.
Security: password length, session length, email verification, 2-step sign-in (allow / require for staff)	Applies to new sign-ins.
Save changes / Discard	Saves every tab at once.

7.18 Audit log

Address: `/console/audit`

Who did what and when, for every admin and money action.

Control	What it does / where it leads
Filters: Who, Company, Action, From / To, Search	Narrow the log.
Show detail	The full record (what changed, reason).
Export CSV	Downloads the filtered log.

8. End-to-end scenarios

> Run these after checking the screens. Each one crosses several roles and is how the client will use the demo.

Buy and learn

1. Visitor: sign up, confirm the email.
2. Learner: add a course to the cart, apply a coupon, pay with 4242 4242 4242 4242.
3. Check: receipt email, order in Purchase history, course in My learning.
4. Player: watch a video, pass a quiz, hand in the assignment.
5. Instructor: mark it in Assignments. Learner: sees score and feedback and gets a notification.
6. Finish every lecture: certificate appears; check it on /verify.

Refund

1. Learner: Purchase history > Refund (within 30 days).
2. Check: access removed, refund email, order shows Refunded, staff bell shows the self-refund.
3. Staff: Sales & orders > Refunds lists it.

Subscription

1. Learner: Plans > Start free trial.
2. Check: included courses show "Included in your Personal Plan".
3. Staff: Subscriptions shows the new subscriber and the plan change.

Become an instructor and publish

1. Learner: Teach on LearnHub > apply.
2. Staff: Instructors > Applications > Approve.
3. Instructor: create a course, add modules and every lesson type, set a price, Publish > Submit for review.
4. Staff: Approvals > Request changes (notes). Instructor sees the notes, fixes, submits again.
5. Staff: Approve. The course appears in the catalogue.

Questions and reviews

1. Learner: ask a question in the player, leave a review.
2. Instructor: Q&A and reviews > answer and reply.
3. Learner: notifications for both. Another learner: report a review.
4. Staff: Reviews > Reported > Hide. Author and reporter are told.

Company training

1. Company admin: Invitations > invite a person (your own email).
2. New person: accept, sign up, land in the company.
3. Company admin: Requirements > new requirement for that person's job role; Assign training.
4. Person: Required training shows it; completing it turns the matrix cell green.
5. Company admin: exempt someone, record an outside completion, send a reminder; check Reports > Audit trail.

Payouts

1. Instructor: Payouts > add a payout method > Request a payout.
2. Staff: Payouts > Verify details, Approve, Mark paid with a reference.
3. Instructor: notification and the payout shows Paid.

Support

1. Learner: Help & support > New request.
2. Staff: Communications > ticket > Internal note, then Reply.
3. Learner: sees the reply (not the note) and a notification.

Platform switches

1. Staff: Settings > Maintenance mode on.
2. Learner (other browser): sees the maintenance page. Staff still works.
3. Staff: switch it off again. Try Guest browsing off (visitors must sign in to browse) and back on.

9. Who gets which notification

> Every notification appears under the bell and on /notifications; most are also emailed (each person can change this in Settings > Notifications). Clicking one opens the related page.

Learner	Order receipt, refund issued, subscription started / renewed / cancelled / payment failed, assignment marked, certificate issued / revoked / expiring in 30 days, answer to your question, instructor replied to your review, course announcement, ticket opened / replied / resolved, your content was hidden, your report was handled, badge earned, required training assigned, account suspended / reactivated, 2-step sign-in turned on / off, broadcasts.
Instructor	Application approved / rejected, course approved / changes requested / rejected / unpublished / relisted, new sale, new review, new question, certificate template approved / rejected, payout request approved / paid / rejected / disputed, payout account verified, commission or permissions changed, suspended / reactivated.
Company admin	Company created (welcome), seats changed, company suspended / reactivated, add-on switched on / off, subscription payment failed.
Staff	New instructor application, course or certificate template submitted, new ticket or reply, content reported, learner self-refund, payout request received, payouts due, a service down (health alert), exchange-rate refresh failed.
